ABOUT RIVAL ARMS

Sometimes standard equipment just isn't good enough. Rival Arms™ is devoted to those who demand more. Rather than a traditional factory that is limited by specific production capabilities, Rival Arms is a coalition of machinists, designers, coaters, and other professionals united under one brand to bring the very best to a world saturated with "standard" equipment.

We are obsessed with accuracy and performance and it sure doesn't hurt to look great while getting results. Whether you are assembling a custom gun from the ground up, or just upgrading a single part, we're here to bring you the best. Precision is everything.
