

- Fits close to the bow.
- Mounting arm holds quiver farther back (closer to the cams) for improved stability and balance.
- Fits left and right-handed bows.
- Enhanced gripper design for easy arrow loading.
- Angle-adjustable riser mount.
- Lightweight composite construction.
- Higher quiver mounting — keep your nocks out of the dirt!
- Rubber hood liner reduces noise and won't dull broadheads.
- Closest arrow pulls toward shooter for fast and stealthy follow-up shots.

REACTOR™ XL PERFORMANCE HUNTING QUIVER

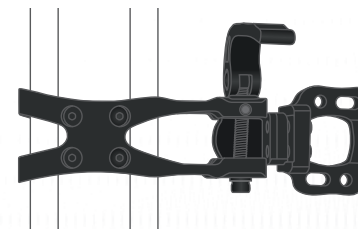

REACTOR™ XL holds your arrows safely and effectively while providing strength, balance, and versatility optimized for modern hunters and performance bows. With an offset mounting bracket, the quiver sits next to the cams to provide better balance at full draw.
