

IMPROVES BOW BALANCE
For better accuracy.

LIGHTWEIGHT
Carbon-fiber tube.

ADJUSTABLE
Weight system tunes your bow.

WEIGHT-FORWARD DESIGN
Concentrates mass where it is most effective.

Customize appearance with colored damping rings.

NEW END•GAME™ STABILIZER

To give hunters the edge they need, END•GAME™ utilizes high-quality materials to bring the center of gravity farther forward where it is more effective. A strong and light carbon-fiber tube supports an adjustable end-weight system, allowing archers to tune the weight to match their bows. Included colored damping rings provide a custom look while absorbing noise and vibration.

AG815B
