INSTALLATION	Quick and easy installation	
CONSTRUCTION	Lightweight metal and composite construction	
WINDAGE / ELEVATION	Full windage / elevation adjustments	
WEIGHT	3 oz.	
COMPATIBILITY	Fits all carbon & aluminum arrows. Dedicated models for left & right-handed bows.	

NEW SURGE™ CLICK-UP ARROW REST

A well-tuned arrow rest does much more than hold your arrow. SURGE™ clicks up to support your arrow with no vertical movement on the draw and stays up when you let down gently. When you fire a shot, the launcher stays up for a precisely-timed moment—supporting the arrow during initial movement. Then the launcher drops down rapidly as the vanes approach the rest providing clean and consistent arrow flight.

ALSO AVAILABLE: AG750RF Replacement felt launcher pads (3-pack)
